

XPC Cosmetics

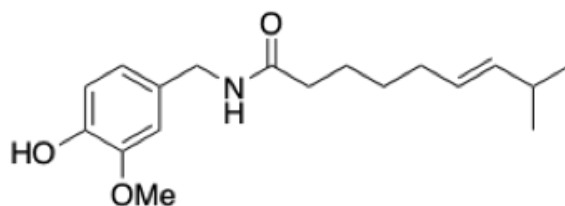

Sustainable capsaicin for cosmetics

XP Chemistries produces capsaicin from forest based raw materials. Capsaicin has many interesting natural effects. Our production process is environmentally friendly, patented and provides end products of guaranteed and controlled high quality. The use of our capsaicin in cosmetics promotes sustainable development for better health and well-being that can be used for difficult-to-treat pain. As our capsaicin is pure it has the same positive properties as naturally extracted capsaicin but do not add unwanted odor, color or greasiness to your cosmetic products. It is free from impurities and heavy metals.

Furthermore, our capsaicin maintains a very exact and uniform batch to batch quality and strength which makes your formulation and dosing easy. We can supply our product as pure powder or dissolved in suitable solvent for your products.

Capsaicin is today used in cosmetic products marketed towards

- Muscle pain relief
- Stiff joints
- Slimming cream
- Anti-age cream
- Lip plumping gloss
- Face mask

Benefits of our capsaicin

- High Purity Capsaicin, >98%
- Odor free
- No color
