Sustainable capsaicin for life science

XP Chemistries produces capsaicin from forest based raw materials. Capsaicin has many interesting natural effects, as an additive it could be a powerful way to reduce pain and improve health of humans and animals. Naturally occurring capsaicin is used today in a wide range of functional foods and supplements, among other things, due to its pain-relieving effect, weight-controlling properties and improved gut microbiome. Our patented sustainable production provides end products of guaranteed and controlled high quality.

Furthermore, our capsaicin maintains a very exact and uniform batch to batch quality and strength which makes your formulation and dosing easy. We can supply our product as pure powder or dissolved in suitable solvent for your products.

Capsaicin is today used in cosmetic products marketed towards

- Muscle pain relief
- Stiff joints
- Slimming cream
- Anti-age cream
- Lip plumping gloss
- Face mask

Benefits of our capsaicin

- High Purity Capsaicin, >98%
